

FARMCOMP Farmex HT-PRO Hay Moisture Tester

Farmex HT-PRO is a quick and reliable tester for quality assurance and storage control of baled hay. The tester shows both moisture content and temperature of hay. With the Farmex HT-PRO you can ensure that the hay is dry enough for storing and you'll notice early if the hay starts to warm up.

Using of the tester is easy: For measuring humidity and temperature there's a large button and the measuring will happen with a single push of the button.

To ease the use of the meter in poor light there's a backlight that can be turned on or off by the user.

- Large, clear buttons
- Measurement range: 8-30 %*
- Temperature range: 0-99 °C
- Probe length: 50 cm
